Web Development - Activity Based Learning

Name: **M. Rishi** Roll No: **26001162** Section: **CSM-05**

1. My Portfolio Website

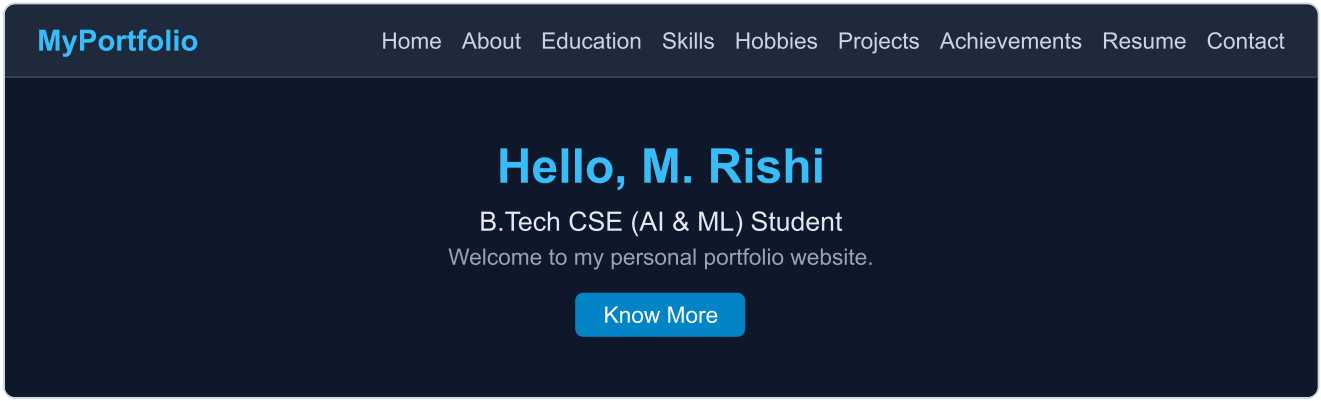

HTML Code:

```
<!DOCTYPE html> <html lang="en"> <head> <meta charset="UTF-8"> <meta name="viewport" content="width=device-width, initial-scale=1.0"> <title>My Personal Portfolio</title> <link rel="stylesheet" href="styling.css"> </head> <body> <!-- Navigation Bar --> <header> <nav> <h2 class="logo">MyPortfolio</h2> <div class="nav-links"> <a href="#home">Home</a> <a href="#about">About</a> <a href="#education">Education</a> <a href="#skills">Skills</a> <a href="#hobbies">Hobbies</a> <a href="#projects">Projects</a> <a href="#achievements">Achievements</a> <a href="#resume">Resume</a> <a href="#contact">Contact</a> </div> </nav> </header> <!-- Profile --> <section id="home" class="hero"> <h1>Hello, M. Rishi</h1> <h3>B.Tech CSE (AI & ML) Student</h3> <p>Welcome to my personal portfolio website.</p> <a class="btn" href="#about">Know More</a> </section> </body> </html>
```

CSS Code:

```
/* Basic styling */ * { margin: 0; padding: 0; box-sizing: border-box; scroll-behavior: smooth; } body { font-family: Arial, sans-serif; background-color: #0f172a; color: white; line-height: 1.6; } /* Navigation bar */ header { background-color: #1e293b; position: sticky; top: 0; z-index: 10; } nav { display: flex; justify-content: space-between; align-items: center; flex-wrap: wrap; padding: 18px 5%; } .logo { color: #38bdf8; } .nav-links { display: flex; flex-wrap: wrap; }
```

Output:

Explanation:

1. The above website is written using basic HTML and CSS code.
2. No JavaScript is used for building the website.
3. In the above website, Home navigates to a page which shows the details of the person.
4. About navigates to the person's identity, studies, and schooling.
5. Education, Skills, Projects, and Achievements tell about his standards and discipline.

2. My College Website

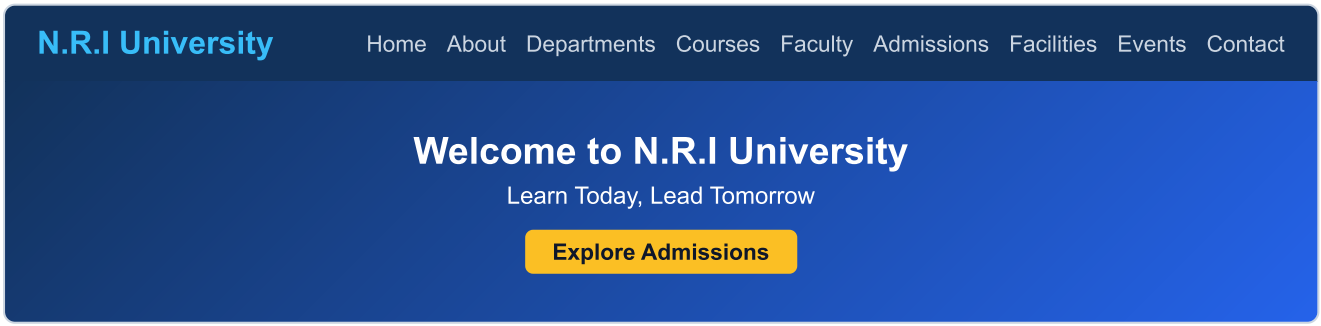

HTML Code:

```
<!DOCTYPE html> <html lang="en"> <head> <meta charset="UTF-8"> <meta name="viewport" content="width=device-width, initial-scale=1.0"> <title>N.R.I University Website</title> <link rel="stylesheet" href="college.css"> </head> <body> <header> <nav> <h2 class="logo">N.R.I University</h2> <div class="nav-links"> <a href="#home">Home</a> <a href="#about">About</a> <a href="#departments">Departments</a> <a href="#courses">Courses</a> <a href="#faculty">Faculty</a> <a href="#admissions">Admissions</a> <a href="#facilities">Facilities</a> <a href="#events">Events</a> <a href="#contact">Contact</a> </div> </nav> </header> <section id="home" class="banner"> <h1>Welcome to N.R.I University</h1> <p>Learn Today, Lead Tomorrow</p> <a href="#admissions" class="btn">Explore Admissions</a> </section> </body> </html>
```

CSS Code:

```
.nav-links { display: flex; flex-wrap: wrap; gap: 12px; } .nav-links a { color: white; text-decoration: none; transition: color 0.3s; } .nav-links a:hover { color: #fbbf24; } .banner { min-height: 350px; padding: 70px 20px; text-align: center; background: linear-gradient(135deg, #12325b, #2563eb); color: white; display: flex; flex-direction: column; align-items: center; justify-content: center; } .banner h1 { font-size: clamp(2rem, 5vw, 3.5rem); }
```

Output:

About Our College

NRI University provides quality education and encourages innovation, research, teamwork and professional growth. Our goal is to prepare students for successful careers.

Explanation:

1. The above website is built using basic HTML code and CSS code.
2. The About navigates to the main page of the College Website.
3. The Courses and Skills offered navigates and tells about the courses offered in the college and the skills trained by the faculty.
4. The Contact navigates to the official contact phone number of the college.

3. My E-Mart Website

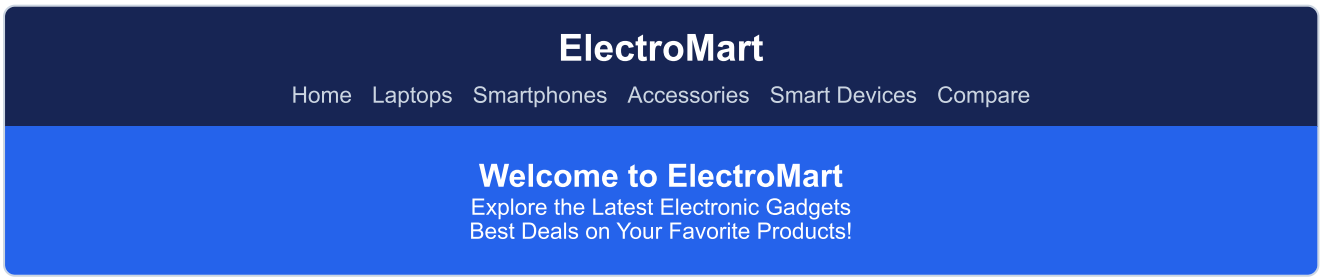

HTML Code:

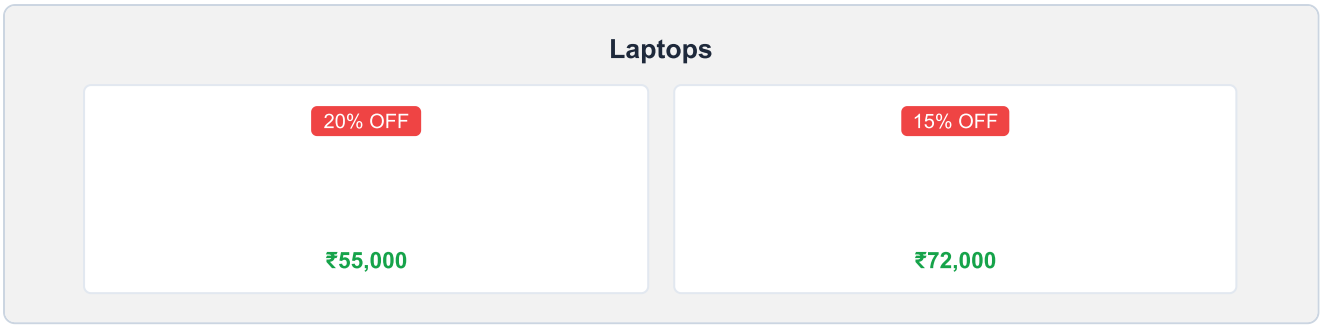

```
<!DOCTYPE html> <html lang="en"> <head> <meta charset="UTF-8"> <meta name="viewport" content="width=device-width, initial-scale=1.0"> <title>ElectroMart Electronics Catalog</title> <link rel="stylesheet" href="e-store.css"> </head> <body> <header> <h1>ElectroMart</h1> <nav> <a href="#home">Home</a> <a href="#laptops">Laptops</a> <a href="#phones">Smartphones</a> <a href="#accessories">Accessories</a> <a href="#smart">Smart Devices</a> <a href="#compare">Compare</a> </nav> </header> <section id="home" class="banner"> <h2>Welcome to ElectroMart</h2> <p>Explore the Latest Electronic Gadgets</p> <p>Best Deals on Your Favorite Products!</p> </section> </body> </html>
```

CSS Code:

```
header { background-color: #172554; color: white; padding: 20px; text-align: center; } nav { margin-top: 15px; } nav a { color: white; text-decoration: none; margin: 10px; } nav a:hover { color: #facc15; } .banner { background-color: #2563eb; color: white; padding: 25px; text-align: center; }
```

Output:

Explanation:

1. This website is built using basic HTML and CSS code.
2. The Home navigates to the main page of the e-mart website.
3. Compare navigates to a page in which the prices of two laptops or smartphones are compared to find the best choice.
4. Accessories navigates to other electronics pages.

Case Studies Summary & Technologies Used

1. **My Portfolio Website:** Objective to create a personal branding site showcasing skills, projects, resume, and contact information.
2. **My College Website:** Objective to develop an informational website for a college including department listings, admission info, and faculty profiles.
3. **My Electromart Website:** Objective to build a product catalog showcase for electronics.

Technologies Used: 1. HTML5 (Structure and semantic markup), 2. CSS3 (Styling, layout, responsiveness).
Conclusion: *All of the above outputs are the test cases of Activity Based Learning of Web Development.*
